

Yellow Learns About Germs

Instructions for Talking Cards

(pack includes 12x talking cards)

The Yellow Learns About Germs game can be used as a standalone resource or as an extension activity to the Yellow Learns About Germs storybook/animation.

This game consists of 12 photographs that show a range of situations where germs may spread. Early Years Practitioners should explain the situation on each card and allow students to decide if the action prevents or risks causing the spread of germs.

The children's responses will showcase understanding and current knowledge.

Orla covers her face when she sneezes.

Erik sneezes into a tissue and throws the tissue in the bin.

Kai keeps sneezing into tissues and leaves the tissues on the school table.

Hardeep is helping her mum bake a cake but did not wash her hands.

Li is using his tablet on the toilet.

Efia feels poorly and has a temperature so she is staying in bed.

**Jackson and his mum wear face masks to the supermarket
because there is a virus in the community.**

Patryk has been playing basketball and has not washed his hands before lunch.

Summer uses hand sanitizer before visiting her grandmother in the hospital.

Joy has a cold and is kissing and hugging all of her cousins.

Alba is picking her nose and wiping her fingers on the toys in the play centre.

Yasmin and her friends all wash their hands before lunch.
